

Data Journalism

How do you get started?

By Marianne Bouchart

[@Maid_Marianne](#) [@GENinnovate](#)
mbouchart@globaleditorsnetwork.org

Introduction

Journalists have to acquire new skills to keep up with the amount of information now available online.

Being able to work with large datasets is one of them.

First: How do I start?

First: How do I start?

A person in a dark suit and patterned tie is shown from the chest down, holding a glowing, translucent digital interface. The interface displays various data visualizations, including a line graph on the left, a bar chart on the right, and a central area with a blue and white bar chart and a glowing blue line. The background is a plain, light-colored wall.

With a question!

Just how big are the Thailand floods?

How bad is the disaster in Thailand? **David McCandless** takes a look

Information on more than 140,000 Terrorist Attacks

The Global Terrorism Database (GTD) is an open-source database including information on terrorist events around the world from 1970 through 2014 (with annual updates planned for the future). Unlike many other event databases, the GTD includes systematic data on domestic as well as international terrorist incidents that have occurred during this time period and now includes more than 140,000 cases. FEATURED

How do you use the GTD?

Thousands of researchers, analysts, policy-makers, and students use the GTD every day. In an effort to better understand the strengths and limitations of the GTD in practice, START would like to learn more about how the GTD informs your work. While we always welcome feedback on the database from users, we now invite you to let us know more about your responsibilities and how the GTD has been helpful to your efforts to better understand the causes and consequences of terrorism.

RAND Database of Worldwide Terrorism Incidents

The RAND Database of Worldwide Terrorism Incidents (RDWTI) is a compilation of data from 1968 through 2009.

For 40 years, the RAND Corporation has been at the forefront of terrorism and counter-terrorism studies. In support of this work, RAND has developed and maintained a database of terrorism incidents stretching back to 1968, which provides comprehensive information on international and domestic terrorism. Over the years, many public and private sponsors have contributed to the maintenance of the RDWTI and its predecessors, the RAND Terrorism Chronology and the RAND-MIPT Terrorism Incident Database.

EU Data Portal

The screenshot shows the European Data Portal homepage. At the top, there is a header with the European Union flag and the text "EUROPEAN DATA PORTAL". To the right of the header is a search bar labeled "Search Portal" with a magnifying glass icon. Below the header is a large banner featuring a map of Europe with various national flags. The banner contains the text "Search Datasets" and a search input field with the placeholder "Search datasets...". To the right of the input field is a blue button labeled "Search Q". Below the input field is a link for "Advanced Search (SPARQL)". In the top right corner of the banner is the "EUROPEAN DATA PORTAL" logo. Below the banner is a navigation bar with a home icon and the following links: "What we do", "Providing Data -", "Using Data -", "Library -", and "Data -". Below the navigation bar is a "Latest News" section with three news items. The first item is dated 22/03/2016 and is about the development of innovative apps in the environmental and social domains. The second item is dated 21/03/2016 and is about the #Hack4Swe event. The third item is dated 18/03/2016. To the right of the "Latest News" section is a banner for a survey asking if the user is a start-up, SME, or large corporation using Open Data, and encouraging participation and sharing of key facts and figures. Below the survey banner is a "Browse Categories" section with five categories: Agriculture, Fisheries, Forestry & Foods; Energy; Regions & Cities; Transport; and Economy & Finance. Each category has a corresponding icon.

Global and regional under-five mortality trends, 1990-2015
and gap for achieving the MDG4 target

MDG4 target: to reduce by two thirds, between 1990 and 2015, the under-five mortality rate

Update: 30 September 2016

Reducing child mortality to achieve MDG 4: Overall, substantial progress has been made towards achieving MDG 4. The number of under-five deaths worldwide has declined from 12.7 (12.6, 13.0) million in 1990 to 5.9 (5.7, 6.4) million in 2015. This translates into 19 000 fewer children dying every day in 2015 than in 1990. The remarkable decline in under-five mortality since 2000 has saved the lives of 48 million children under age five – children who would not have survived to see their fifth birthday if the under-five mortality rate from 2000 onward remained at the same level as in 2000. Yet, despite these substantial gains, progress is insufficient to achieve the MDG 4 target.

How valuable? Extremely, immensely, incredibly valuable. I expected this workshop to teach me a few things, like how to edit video. I did not know that, instead, I would learn a thousand things and would leave feeling like I just spent a semester at school again, in the best way. This workshop gave me a lightning bolt. I feel giddy again.

CIJ's Data Journalism handbook

Data Journalism

This handbook is for all journalists who want to master the art of interrogating and questioning numbers competently. Being able to work with figures and investigate numbers is not a new form of journalism but a skill that all journalists can acquire.

Data journalism is the ability to analyse and examine numbers and to know how to manage large datasets and read them correctly. This handbook will guide you through the basics and allow you to use numbers to find and support your stories.

DATA JOURNALISM FUNDAMENTALS

The JMSC is offering a five-week course on the fundamentals of data journalism starting 4 April, in partnership with the Google News Lab and top news organisations in Asia.

Taught by a panel of experts on data journalism from New York City, San Francisco, Bangkok, Hong Kong and Shanghai, the course will introduce the latest tools in data acquisition, analysis, interpretation and visualisation. Students will also learn how to integrate these skills to tell compelling stories.

Regional newsroom partners for the course include [IndiaSpend](#) (India), [Malaysiakini](#) (Malaysia), [KataData](#) (Indonesia), [Caixin](#) (China) and [DataLEADS](#) (India).

Targeting journalists of all levels of experience, students and anyone with an interest in data journalism, the course will also feature case studies from newsrooms in Asia and data stories by leading international media organisations.

Data Journalism Awards

#dja2016

Submission deadline: 10 April 2016

The fifth edition of the Data Journalism Awards competition is now on. Whether you are a large news organisation or a small startup, if you have created a compelling data-driven project that oozes innovation and flair, you have until **10 April 2016** to submit your entry at bit.ly/dja2016.

Sign up to the DJA Newsletter at bit.ly/djaNL

March Newsletter

Welcome to the Data Journalism Awards newsletter! You're receiving this because you've opted to get updates about THE global competition for data journalism.

This newsletter is curated by [Marianne Bouchart](#), DJA manager working with [Simon Rogers](#), DJA director, and [Paul Steiger](#), president of the jury. It is sent twice a month with our pick of the latest in data journalism and visualisation.

The [Data Journalism Awards](#) is the first international competition recognising outstanding work in the field of data journalism worldwide. It is organised by the [Global Editors Network](#) and sponsored by the [Google News Lab](#) and the [John S. and James L. Knight Foundation](#). This year's competition is now on and you have until **10 April 2016** to submit a project via the [DJA 2016 website](#).

As any awards competition go, you need to be in it to win it. So whether you are a large news organisation or a small startup, if you have created a compelling data visualisation, an interactive map or any data-driven project that oozes innovation and flair, come and submit your work on the [GEN Community](#) platform.

Prizes for the DJA 2016 are worth 1,000€ each and will be awarded at a special ceremony at the Vienna City Hall during the fifth annual [GEN Summit](#) on 16 June 2016.

You can find all the information about this year's awards (including key dates, categories and rules) on the [DJA 2016 homepage](#).

Five things we liked this month

Each day brings a new data journalism or visualisation project. Here are some of our recent favourites:

Where Trump could lose, and other things to watch for on Super Tuesday

By Ted Mellnik, Kevin Schaul, Kevin Uhrmacher and Samuel Granados
Publication: The Washington Post
Country: U.S.A.

Nearly 600 delegates are up for grabs on Super Tuesday — the most for any day of the 2016 primary season. The bulk of them come from seven Southern contests, including the day's biggest prize: Texas. In this [data-driven article](#), the team from the *Washington Post* lets you explore the data.

Racism: The terror of the other

By Kai Biermann, Philip Faigle, Astrid Geisler, Karsten Polke-Majewski, Hannes Soltau, Julian Stahnke, Tilman Steffen and Sascha Venzohr
Publication: Zeit Online
Country: Germany

There were many attacks on refugee shelters across Germany in the past year. 279, to be more precise, according to [this investigation](#) from Zeit Online. In [this compelling series](#) on racism, the team of editors investigated on these attacks to learn about their perpetrators.

Gun violence in America, in 17 maps and charts

By German Lopez
Publication: Vox.com
Country: U.S.A.

Among developed nations, the US is far and away the most violent — in large part due to the easy access many Americans have to firearms. This [data-driven article](#) shows what that violence looks like compared with the rest of the world, why it happens, and why it's such a tough problem to fix, using maps and graphs.

5 of the best: podcasts about data journalism

By Caria Pedret
Publication: The Online Journalism Blog
Country: U.K.

Podcasts are a great way to listen to stories on the move, be entertained, or keep up with developments in a particular field. However, have you ever thought about using them to learn data journalism? In [this article](#), Caria Pedret pulled together some of the best podcasts about data.

3 Examples of interactive storytelling that aren't Snow Fall or Firestorm

Thank You!
